

2400 LTR JACKY SLICK FEEDER

Product Code

SLF2400PE

The SLF2400PE Slick Feeder is designed to facilitate the dispensing of pellets and lick rations.

The open flow design of the feed area has proved to be better when feeding animals that 'slobber' (e.g. calves). This design doesn't block as easily, even if the feed products swell when they get wet, and the unique dish shaped feed area is more easily cleaned by the sweeping motion of the animal's tongue

BENEFITS

The 2400L Slick Feeder design incorporates a poly feeder body mounted in a sturdy galvanized steel frame. The easy action slide on lid provides an unparalleled level of weather resistance, and both the rate of feed discharge and the accessibility of feed are controlled by the galvanized steel feed adjustment plates. Extra protection from the elements is provided by the flexible rubber weather skirts that are fitted over each feed tray.

Benefits

- Approx 2400L capacity
- Approx 1700kg feed capacity
- No seams to split and leak
- Translucent walls allow easy assessment of remaining feed level
- Unique rounded design – prevents blowing over when empty
- Easy action slide on lid – fully removable
- Heavy duty, fully enclosed fork pockets
- Steep run slope for complete evacuation of contents
- Convenient sizing for transport

SPECIFICATIONS

Code	SLF2400PE
Length	2400mm
Width	1200mm
