

CUSTOMISED MOBILE FEED TRAILERS

JACKY Bins are easily adapted to serve as mobile feed delivery trailers.

This can be achieved by either

- Mounting a JACKY Bin on a 'Skel Trailer' chassis (allows the bin to be removed and used as a standard JACKY Bin) or
- Incorporated as a fixed component in a trailer design.

JACKY Feed Trailers can be operated by manually opening the hatch to discharge the feed, or a 12V actuator kit makes an excellent addition to allow operation from inside your vehicle.

BENEFITS

Features

- Translucent hopper - see product level through walls
- Quality tyres and rims
- Galvanised frame
- Fully removable lid
- Includes swing down jockey wheel

Ideal for

- Sheep nuts
- Calf pellets
- Horse feed
