

JACKY AUGER UNIT 240V ELECTRIC DRIVE

Product Code

LA1500/8SP5.275

Designed and manufactured to ensure easy and trouble free service for many years, the 240V Electric Drive auger unit has been tried, tested and proven over many years.

Standard units feature a 5" diameter auger that is 3.0m in length. The 240V motor is located at the top of the auger, and is ready to connect to a standard 10amp single phase supply (e.g. generator). Integral emergency stop button is supplied standard.

As an additional bonus, this auger unit may be used like a standard JACKY Bin by emptying the hopper via the standard hatch plate on the face of the bin.
