

JACKY AUGER UNIT HYDRAULIC DRIVE

Product Code

LA1500/4HYD5/2.75M-FNTG

This compact feed/fertiliser transfer unit is very simple, yet very functional. The generous amount of torque that can be delivered to the auger via the hydraulic motor is ideal for moving heavy products such as fertilisers.

Standard units feature a 5" diameter auger that is 3.0m in length. Hydraulic hoses and couplings between the 50cc motor and back of the unit are provided for quick and easy attachment to existing machinery couplings.

BENEFITS

SPECIFICATIONS

Code	LA1500/4HYD5/2.75M-FNTG
Length	3000mm
Width	1800mm
Height	2300mm
